

AUGUST NEWSLETTER 2026

Client Success Story

I was skeptical at first, but after just a few Cryo T-Shock treatments, I started noticing my clothes fitting better and my waist looking more defined. The team made me feel comfortable every step of the way, and I loved that there was no downtime. Seeing my Styku scans and progress photos kept me motivated, and I couldn't be happier with my results!" –Rena

At Contour Body Imaging, every transformation is unique. Our goal is to create a customized treatment plan that fits your body, your lifestyle, and your goals. Whether you're looking to target stubborn fat, improve skin firmness, or simply feel more confident, we're here to help you every step of the way.

Results vary from person to person, and multiple treatments may be recommended based on your individual goals.

- Support for your body's natural healing process

*It's the perfect addition to your body contouring
plan*

The Holidays Are Closer Than You Think

Summer may still be here, but the holiday season is just around the corner. Before you know it, you'll be attending parties, family gatherings, holiday photos, and seeing people you haven't seen all year.

The best time to start your body contouring journey isn't in November—it's now. Our treatments work with your body's natural processes, so giving yourself a few months allows you to achieve your best results just in time for the holidays.

This year, walk into every gathering feeling confident, sculpted, and camera-ready.

This is where Cryo T-Shock comes in!

Cryo T-Shock can help:

- Reduce stubborn fat pockets
- Improve body contours
- Support skin tightening
- Reduce the appearance of cellulite
- No surgery or downtime

Many clients begin noticing changes over the following weeks as their body naturally processes the treated fat cells.

Don't forget Recovery

Results don't stop when appointment ends.

To help maximize your treatments:

- Stay hydrated
- Get regular movement
- Follow your aftercare instructions
- Consider adding a lymphatic drainage session to support your body's natural recovery process

Many of us have stubborn fat despite diet and exercise.

CoolSculpting® technology uses controlled cooling to target and kill only these fat cells.

In the weeks to follow, your body naturally processes the fat and eliminates these dead cells.

CoolSculpting procedure results are long-term,¹ as treated fat cells are gone for good.
